the European Union

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Research Executive Agency. Neither the European Union nor the granting authority can be held responsible for them.

# What is MuseIT?

MuseIT is a European project (Horizon Europe), that will co-design, develop, and co-evaluate a multisensory and user-centred online platform for enriched engagement with cultural assets with inclusion and equal opportunity for all as core principles.

## Why this project?

Despite technological advancements, people with disabilities tend to experience more difficulties in accessing cultural assets & experiences. **There is a need to create more opportunities for all members of society to participate equally in cultural life.**

## Who are the beneficiaries?

All people, with focus on those with disabilities

Cultural clusters, institutions and organisations

## What the project will provide?

**Multisensory representations**, to improve the accessibility of cultural assets for all, regardless of functional or sensory impairments.

**An accessible digital platform** where creators can co-create at a distance, in real-time, with a maximised feeling of presence and involvement.

**An inclusive repository**, thanks to the development of methodologies for preserving and safeguarding cultural heritage with inclusion at its core.
